

senior Flexonics

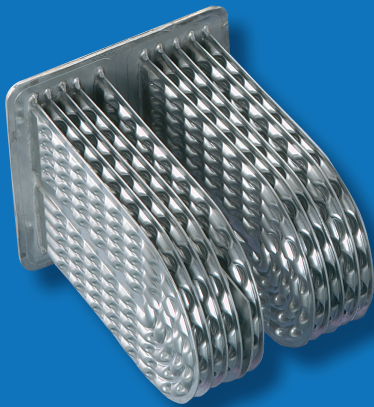

Stainless Steel and Special Alloy Heat Exchangers

Multi-Fluid Heat Exchanger

I-Plate Heat Exchanger

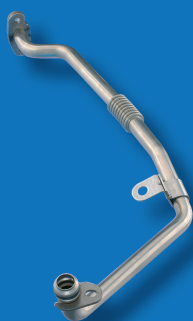

U-Plate Heat Exchanger

Co-Axial Heat Exchanger

Ancillary Products

Fluid Tubing

Senior plc

- Senior is an international manufacturing Group with operations in 11 countries. Senior designs, manufactures and markets high technology components and systems for the principal original equipment producers in the worldwide energy markets, aerospace, land vehicles and defence
- Annual Turnover for 2009: £540.1 million

Heat Exchange

- Bespoke design to match customer needs
- Optimised heat exchange to match application
- Compact and routable designs
- Manufactured from austenitic stainless steels and specialist alloys to suit application
- Light weight (Typical 0.3mm thick heat transfer plates)
- Minimised joints, maximised reliability
- Patented Designs

Ancillary Products

- High vibration and thermal resilience
- Light weight, corrugated and rigid designs
- Wide variety of end fittings to suit interface requirements

Support Services

Full Project Management support, encompassing:

- Development (CAE)
- Design and CAD integration
- Testing (Heat exchange, vibration, pressure....)
- Full customer focus throughout project life cycle
